Google Chrome – Disable Cache

To disable Google Chrome's cache start up the Developer Tools (press function key F12) and **press the little** "gear" icon on the right bottom of the screen (see picture bellow)

Google

	Settings

Google Chrome Settings

If you do that, the settings screen will appear and you should see the "Disable Cache" setting, check the box (see picture below):

And that disables Google Chrome's Cache. Close the "Developer Window" by clicking here. You can now return to browsing your chosen website.
